DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of figures 1-13e, 24-29, claims 1-24 in the reply filed on 06/24/04 is acknowledged.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations of claims 23, 24 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Win. The patent to Win teaches structure as claimed including a plurality of ribs (11) spaced parallel to each other, a plurality of cross beams (12) positioned transverse to each rib, a puncture resistant film (15) disposed over the ribs and cross beams.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 3637

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 23, 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Win. The patent to Win teaches structure substantially as claimed as discussed above including a non resistant film. The provision of decorative designs or lettering on a covering is well known and commercially used. It is noted that the film of Win and any lettering or decoration would provide a frictional resistance, thereby providing structure as claimed.

Allowable Subject Matter

Claims 1-21 are allowable over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest a composite pallet comprising an upper deck comprising a first half, a second half disposed in communication with a major face of the first half, a support material disposed between the first half and the second half, an upper frame member supporting the upper deck, a plurality of foot members disposed in physical contact with the upper frame member, a lower frame member disposed in physical contact with the plurality of foot members.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Fowler, Angelbeck, Jr., Longaker, Kuga, Apps, Moore, Torrey teach structure similar to applicant's.
